

# CONNECTED CONSTRUCTION

## IN THE QA/QC WORKFLOW

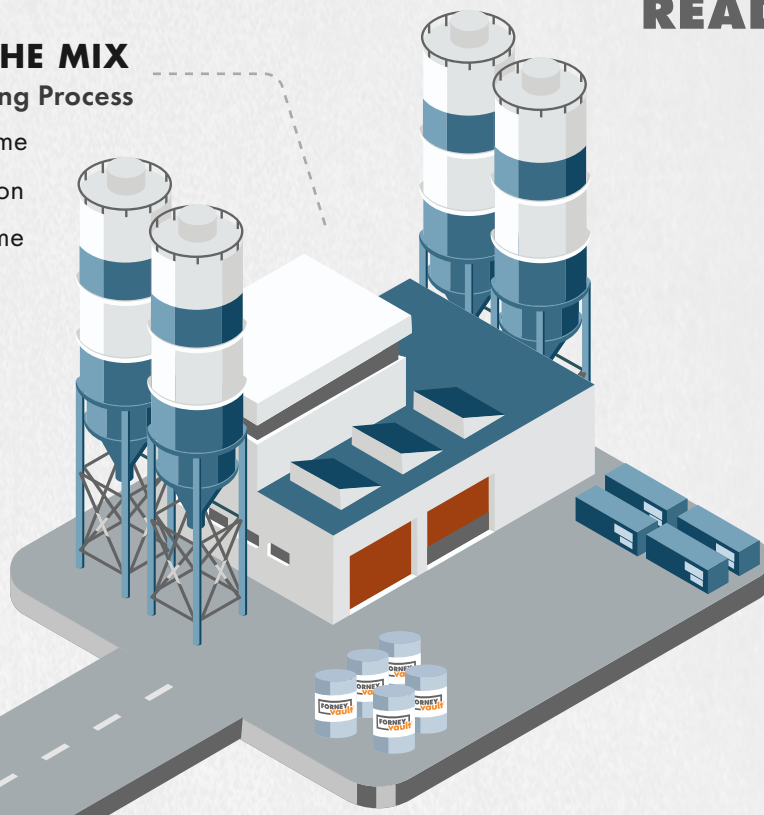

Integrated technologies unite data flows across the entire construction ecosystem - from the plant to the project owner and every step in between.

### KEEP ERRORS OUT OF THE MIX

with an Automated QA/QC Testing Process

- Monitor concrete quality in real-time
- Eliminate specimen misidentification
- Analyze mix performance over time

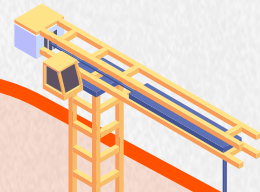

### READY-MIX PLANT

Generate order ticket with concrete specification data

### CONSTRUCTION SITE

### DELIVER CONCRETE

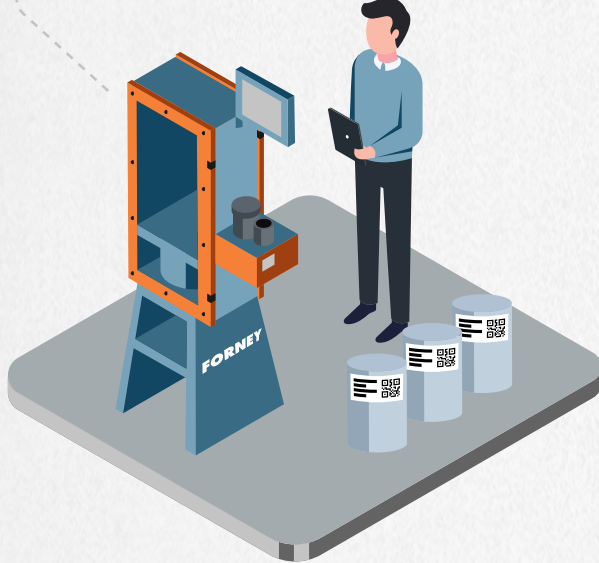

Capture delivery ticket data and wet concrete properties

### KEEP PROJECTS MOVING

with ForneyVault-equipped Test Labs

- Automate manual tasks and get more done
- Proactive Alerts flag problems early
- Eliminate redundant administrative work

### CONSTRUCTION MATERIAL TEST LAB

#### DITCH THE CLIPBOARD

with an Integrated Smart Machine

- Optimize technician time
- Reduce test errors and variance
- Eliminate data silos

### ENGINEER

#### PROMOTE TRUST & TRANSPARENCY

with Integrated CMT Software

- Automate manual processes
- Focus on what's important with alerts
- Elevate material non-compliance issues

### PROJECT OWNER

#### GET THE OUTCOME YOU EXPECT

with Instant Access to Accurate, Unalterable Test Results

- Uncover problems in real-time
- Prove that CMT data was tested, checked, recorded and approved correctly
- Trust your system
- Trust your decisions
